Subject: # 31 - 9053 Shook rd

My concerns of the work done on lot 31 - 9053 shook rd in Sun-Dorn

- There has been no Geo technical Inspections on deck footings or column .
- No Engendered drawings
- Were is the septic field / tank in relation to deck footings
- There has been issues with septic field issues (pumping waste into the play ground in the past)
- The deck has been there for years and still no hand rails
- She has no regards for neighbors
- Continually disregards Sun-Dorn Policy's

I have been through this process my self and i had to build my deck roof by the book and im ok with that . As FVRD said to me these bylaws and building codes are here for the safety and well being of the people around here also for home insurance

Thank you
Dave Leask
