Hello Julie

So the engineer is going to write up a letter stating the elevations and why we need to move up I'll send you that as soon as I get that, but i figured i would just give you a quick summary.

The initial basement depth was 25.9m, the estimated perched water is at 26.22m and as per the engineers recommendations we need to be 1m above said perched water for a total of 27.22m, we applied for 1.6m to have some wiggle room incase anything else was needed.

If you have any other questions or I missed anything please let me know.

Chloe
