Carlos

Sorry for the delayed response

After our discussion on the phone I have no concerns in regards to fire protection portion of your application other than a few comments. Please keep egress and access points open for first responders, as you mentioned generators in the list of equipment please use these in a well ventilated secure area away from the public.

I would recommend you contact the Abbotsford Fire Rescue service, as they would provide service in that area, and inform them of the date and times of this event.

I hope you have a safe and successful event

Regards

Hi Reg,

Here's my original email.

Have a great weekend,  
Carlos

Hello Reg,

Thank you for your call yesterday.

The reason I contacted your office was to gain further clarity as to our requirements regarding "fire protraction" and/or "any other matter pertinent to the Electoral Area Emergency Services Jurisdiction"? I believe that part of the permit process includes written certification from Chris Wilson certifying that adequate arrangements for fire protection have been made? Here are some facts about our race:

- 16k and 25k trail race on Sumas Mtn on Oct 20th
- race route is along existing trails and service roads
- sponsor tents at the lower parking lot displaying product and providing food and liquids
- gas generators will be located at the lower parking lot
- only source of heat will be a stove to keep the soup warm

Please call or email me if you have any questions.

Kind regards,

Carlos Zamora
